

1252 sq. ft.

3 Bedrooms / 2 Baths

The Cambridge is a very popular traditional log home designed for those who desire a smaller, three bedroom home at an affordable price. This still features the popular open-concept great room with exposed timbered ceiling and fireplace, a deck off the dining room, and open loft overlooking the downstairs. Upstairs, the rear shed dormer maximizes the space in the back bedroom, loft and bath. This efficient, step-saving plan also includes a convenient first-floor laundry/mud room accessible from the kitchen or outside and a built-in kitchen pantry. A bay window in the dining area offers an expanded view out the back. The full-length front porch and double dormers grace the front.

A full set of blueprints of this plan is available. Artist's renderings and floor plans may differ slightly from actual blueprints.
