

*Shown with upgrades*

The design team took the elements of our most popular designs and blended them together to create this beautiful custom log home. It came together as a Chalet style cabin and a mixture of Cape Cod style. At only 1,875 sq. ft. the open layout makes it feel like a 2,500 sq. ft. modern log home with timber accents. The wrap around porches and deck area give you plenty of space for relaxation or to hang out with friends. The expansive glass wall in the great room brings the outdoors in and plenty of light. Make this beautiful modern log home yours.
